

March 24th, 2015

AREA Science Park – Trieste (Italy)

DIAnet Final Event

“Innovation and tools to support Research and Mobility”

Objective: the Seminar intends to provide organizational solutions for all the researchers interested in mobility programs and those institutions willing to offer structured support services for research and set up new services to manage the Academia and Industry Strategy. The Seminar offers participants an overview of the available tools and techniques to support research and mobility in the academic world and new strategies to develop a functional path for researchers.

Contents: it will be held **one workshop** addressed firstly to researchers to pass on knowledge and skills needed to write a successful proposal.

Among the speakers, representatives of agencies, research offices and researchers from national and European institutions which have developed particularly effective organizational models and innovative methodologies for the management of support tools for mobility and research.
